

Expert-supervised gorse control on a local property — Upper Plenty

PRACTICAL WEED CONTROL · UPPER PLENTY

FREE TO ATTEND · HANDS-ON · ALL EXPERIENCE LEVELS

ENGLISH GORSE HANDS-ON WORKSHOP

English gorse is one of the most persistent woody weeds in our district, and many landholders have recently been required to write weed management plans for their own properties. This is the session that answers the next question — **what actually works on the ground**. Spend a morning on a local farm with expert supervisors: cutting and dabbing, handling spray equipment correctly, and seeing the herbicides and technology the professionals actually use. **Bring a plastic bag** and take home some gorse spider mites to try biocontrol on your own place.

WHAT YOU'LL DO ON THE DAY

1 Cut and dab, done properly

The go-to technique for scattered gorse — demonstrated, then practised under supervision

2 Spray application for larger infestations

Correct handling and application, whether you've just finished your ACAP course or are starting from scratch

3 See the results, not just the theory

Inspect gorse stands sprayed in late 2025, plus a blackberry treatment from last spring a short walk away

REGISTER

SCAN TO REGISTER

BYO PPE to take part

Overalls, rubber gloves, hat, safety glasses

Equipment on site

Spray unit, tools and herbicides supplied

Some walking

Uneven ground — wear sturdy boots

WHERE

Cleves Road South

Upper Plenty VIC

A working local property — exact gate details sent on registration

SCHEDULE

9:45 am | Arrive, park and sign in

10:00 am | Gorse, and what actually works

10:30 am | Hands-on: cut and dab, then spray

12:00 pm | Walk to treated gorse & blackberry

12:30 pm | Finish

Want a go with the spray unit? You'll need your own PPE — overalls, rubber gloves, hat and safety glasses. Without it you're very welcome to watch and ask questions.

No question is a silly one. Bring all of them — this is a stress-free, respectful session run by people who've done this work on their own country. **Places are limited — register now.**

PROUDLY SUPPORTED BY

This project is supported by the Victorian Government through the Partnerships Against Pests grants program, delivered by Agriculture Victoria.
